

VECV Commercial Chassis

VE COMMERCIAL VEHICLES
A VOLVO GROUP AND EICHER MOTORS JOINT VENTURE

Considering trends in the commercial market and future payload regulations we have gone towards aluminum and designed light weight frames with patented aluminum cross members. To make sure no compromise on the strength of front and rear under run protection device (FUPD/RUPD) we have avoided welding and came up with new technology of hydrabom rivets, which serve the purpose of fastening with add on strength.

Category:
Full Vehicle

Application:
2015 VE Commercial Vehicles Ltd

Weight Savings:
30% when compared to
previous models

Methodology:
Material Replacement
